Picture of the home after is was remodeled in 1951.

The bricks in the corners of the kitchen were cracking and unrepairable. In Sept. of 1951, the kitchen was torn down by Alma Duke and a dining room, kitchen, bedroom, hall, laundry room and the home's first bathroom with modern plumbing, were built in the kitchen's place. It was built of cinder block and to make the home have a uniform appearance, the additon and the rest of the home were covered in white stucco.
In the Spring of 1979, it was demolished and a 3 ward church building was built that houses Heber's 1st, 6th and 9th Wards. It was built a little west of the house and a fitting tribute to Robert Stone Duke.
